Please help Sun improve your download experience. Please take our 30 second customer satisfaction survey.

For easier, more reliable downloads, try Sun Download Manager.

- Solaris 64-bit requires users to first install 32-bit.
- Information on **picking the right format to download**
- Installation instructions:
  - English
  - Japanese
- For Windows, choose "Windows Online Installation" for the quickest download and installation on a machine connected to the Internet. The size may vary if additional features are selected.

NOTE: The list offers files for different platforms - please be sure to select the proper file(s) for your platform. Carefully review the files listed below to select the ones you want, then click the link(s) to download. If you don't complete your download, you may return to the Download Center anytime, sign in, then click the "Download/Order History" link on the left to continue.

For any download problems or questions, please see the [Download Center FAQ](#).

How long will the download take? [\[?\]](#)

Windows Platform - Java(TM) 2 Runtime Environment, Standard Edition 1.4.2_09		
<a href="#">Windows Offline Installation, Multi-language</a>	j2re-1_4_2_09-windows-i586-p.exe	15.22 MB
<a href="#">Windows Installation, Multi-language</a>	j2re-1_4_2_09-windows-i586-p-rtw.exe	1.35 MB

A File download dialog box will appear. Click on the Save button. Save the file onto your desktop. Refer Figure 3.

**Figure 3: File Download dialog box to save the Java Plugin.**

### Java Plugin Installation

After downloading the file onto your desktop, double click on j2re-1\_4\_2\_09-windows-i586-p.exe file from your desktop.

Click on the yes button to accept the license agreement. Refer Figure 4.

**Figure 4:**Java Plugin Installation Wizard Screen one.

Click next to complete the installation. Refer Figure 6.

**Figure 6:** Java Plugin Installation Wizard Screen three.

Restart your machine after the installation of the Java Plugin.

### Java Plugin Configuration

- a) Open your Microsoft Internet Explorer Browser.
- b) Click on "Internet Options" from the Tools Menu.
- c) Click on the "Advanced" Tab from the Internet Options window. Scroll to the Settings list in the advanced tab.
- d) Ensure that the java plugin is checked for applet support. Refer figure 7.
- e) If the option highlighted in figure 7 is not checked, check it and click on the "Apply" button.
- f) Click on the "OK" button.
